science2business Award 2016

Best collaborations of science with industry will be honored

„How does collaboration works well? How do you deal with the challenges?“ We are looking for the best practical strategies and methods.

science2business Award

EUR 9.000,--

powered by Federal Ministry of Science, Research and Economy

- 1. prize EUR 6.000,--
- 2. prize EUR 3.000,--
- 3 x certificate « One of the Top 5 »

Janssen Special Award

EUR 4.000,--

powered by Janssen Cilag Pharma

Best Poster EUR 1.000,--

powered by life-science Karriere Services (rated by audience)

You are a coordinator, head or a co-worker of a research collaboration which involves at least 1 company and 1 scientific institute (University, University of Applied Sciences, non-university scientific institute)

If the management of your collaboration works well and highly professional, and your research field belongs to life-sciences or bio-sciences, then you should apply for the science2business Award.

The most successful strategies by which scientific results are led to prosperous business will be awarded. Scientific excellence isn't the only foundation of commercial success; it also depends on the excellence of the management. Due to this, the science2business award focusses the quality of the business processes. What's your strategy and path to innovation respectively the market?

Closing Date: 31st January 2016

Janssen Special Award

Janssen, the pharmaceutical division of Johnson&Johnson ranks among the Top 10 pharmaceutical companies worldwide and employs about 40.000 employees in 57 countries. In 2010 all pharmaceutical companies of Johnson&Johnson joined together under the name “Janssen”.

It's the Credo of Janssen to develop and deliver innovative and integrated solutions for health care in order to improve the life quality of patients. There are 5 therapy fields focussed: neuroscience, infectious diseases, oncology, immunology, cardiovascular diseases and metabolic diseases.

Therefore Janssen supports the science2business Award and additionally grants the Janssen Special Award for projects which promise a strong positive impact on health care in future.

Collaborations are invited to apply for the Janssen Special Award if they....

- contribute to a better health care
- stimulate or promote prevention,
- facilitate or improve therapy for patients, or
- implement new technologies in health care.

The Janssen Special Award is endowed at **€ 4.000,--**

life-science-success 2016

Eligibility to participate:

- Any kind of research collaboration which involves companies and scientific units which are not-connected among themselves.
- The cooperation can be a time-limited project, as well as long term oriented teamwork (perpetual cooperation agreements, concrete research projects or business start-ups).
- The main objective is the concerted research and development.
- Scientific fields: life sciences, bio sciences, (Attention!! Applications with no relation to the life-sciences or bio sciences will not be evaluated by the jury).
- Your cooperation already exists and first experiences are available.
- Duration of the cooperation: at least 6 months.
- International collaborations are welcome. Solely the applicant's organisation must be situated in Austria.

The applicants have to fulfill **all** requirements listed above. Applications will not be evaluated by the jury, if they don't meet the demands.

Language: English or Germany

General framework:

- The applicant has to name himself and at least one of the cooperation partners on the application form.
- The jury's decision is final. There's no legal claim to receive the award.
- The submitter warrants that the handed over information and data don't violate any rights or copyrights of third parties. The submitter agrees to indemnify and hold harmless the organizer.
- The applicant explicitly agrees that all information, handed over to the life-science team, can be used for any publication without any restriction. Exceptions must be stipulated before sensitive data are sent to the organization team and the jury.
- In case that it would be a need to verify the sent specifications, the jury possibly may ask the applicant for further information about the cooperation. It's no obligation on it.
- Digital application to office@life-science.eu is the only accepted form.

The Jury: (alphabetically)

Vizektor Univ. Prof. Dr. Josef Glössl, Univ. f. Bodenkultur Wien
Mag. Karin Ibovnik, build! Gründungszentrum, Bundessprecherin AplusB Zentren Österreich
Dr. Helga Pražak-Reisinger, OMV Aktiengesellschaft
DI Peter Schintlmeister, BM f. Wissenschaft, Forschung und Wirtschaft
Dr. Wolfgang Tüchler, Janssen

life-science-success 2016

The winner will be nominated within a multi-stage decision process.

1. Stage: All applications submitted will be evaluated by the jury. Every member of the jury nominates 10 final candidates. The candidates with the best score will be short listed.
2. Stage: The 10 final candidates compete in a public contest at the life-science success (15. März) against each other. Within a 5 minutes presentation, the finalists have to convince the jury of their excellence and competence. The jury will find the definite winner in the immediate following jury meeting.
Date: 15th March 2016, the award ceremony takes place at 18.00 p.m.

Poster Award:

The applicants send their poster of their collaboration in advance to the organizers of life-science Karriere Services. At the life-science-success a poster exhibition will be arranged and all visitors will have the chance to evaluate the displayed posters. The poster which collects the most votes, wins. The poster award is independent of the shortlist.

Your benefit of participating:

- You can reach a broad publicity with your project.
- You will be seen as an experienced business partner by decision maker, investors or potential cooperation partner as you have the possibility to point out your scientific excellence as well as your management competence.
- The channels for the pr activities will be:
 - press release to newspapers and journals.
 - short descriptions and contact details of all projects submitted will be published on www.life-science-success.com
 - the winner will be presented more extensively on life-science-success.com
 - up to 32 cooperations including the contact details and logo will be published in the brochure „life-science-success“.
- You will receive tickets for the life-science-success 2016 on 15th, March for you and your cooperation partner at no charge.
- At the life-science-success all participants of the science2business Award have the possibility to display a poster about their cooperation. So the visitors get an insight in your activities and easily can get in contact with you and your organization.

Advice for Application

Volume of content: max. 3-4 sites

Digital submission is obliged. - kindly send us your application as a Word Doc to office@life-science.at. You can send us a pdf-file too, but not only.

**After receiving your application we will send you a personal Mail of confirmation. If you won't receive it within 2 working days, please contact us via phone and let us know.
T: 0699 111 600 18**

1. Basic data about your collaboration *):

- Responsible person, contact details
- Who else (company, university, research institute) is involved in your collaboration
- number of participants, budget, number of joined organizations.
- When did you start? Duration?

*) This data only will be used for information and not for evaluation.

2. Short description

- Point out, “what’s the subject of your research?” 2-3 sentences (about 350 signs)
This short description will be published in the brochure “life-science-success”.

3. Subject of your research and development (Max ¼ Site)

- Short description of your cooperation’s scientific issue. It must be related to life-sciences or bio sciences. This description will be published on www.life-science-success.com. It’s also the basic paper for press release.

4. The special outstandig of your cooperation’s management? (1 Site)

The science2business Award focusses on the management of a research cooperation. How do you lead an auspicious scientific result to economical success?

We are interested in learning about solutions for extremely difficult or often recurrent challenges within cooperations between science and business.

What is/was the biggest challenge and how did you deal with it?

If you found a highly efficient solution for a specific problem then tell us more about it.

Unterstützt durch:

life-science-success 2016

specific aspects could be:

- efficiency of planning and implementation; strategy and optimized process management, finance, quality assurance, IPR management etc.
- professionell human resource management, personell development
- marketing / distribution
- networking, information management,
- or others

5. Corporate Social Responsibility

Do you create any special gain for the society with your research activities? Do you take care of the balance between economy - ecology and social aspects. How do you support this balance?

6. Results and forecast (1/4 site)

Specify the longterm impact of your cooperation and point out the achieved results.

- results of the cooperation?
